

WHY PARTNER WITH NEW EDGE NETWORKS?

Create recurring income while providing customer satisfaction

Guaranteed largest private network in the country.

New Edge Networks is a facilities-based Managed Services Provider (MSP) that designs, builds and manages private data networks for carrier and business customers. We've earned a unique position in the industry by building the largest private data network utilizing a blend of DSL and Frame Relay access elements. With the largest network access footprint in the country, we're able to provide coverage to 100% of business addresses in the United States.

New Edge Networks integrates multiple providers, locations, and technologies so you get a tailored network solution and a single point of contact.

Because of our network, our carrier relationships, our innovative technologies, and our flexible approach to business, we are the only data services provider able to offer service to you no matter where you are, no matter what you need. By seamlessly integrating broadband access services and networking technologies, we can lower your costs and provide scalable, customized solutions. Whether you need Internet access to a single rural location, secure connectivity between a dozen sites regionally, or encrypted communication between hundreds of locations nationwide, New Edge Networks can be your single point of contact for secure data communications.

Access Technologies

Private

- DSL
- T1
- T3, OC12, OC48
- Wireless
- Frame Relay
